

SYON VIJAE THYVALAPPIL

CSE Student | Aspiring Developer

ABOUT ME

Computer Science student at VIT Vellore and Code2Create Finalist. Junior Core member at VinnovateIT, currently contributing to the web migration of campus applications. Focused on Python automation, local AI implementation, and systems optimization.

EDUCATION

Vellore Institute of Technology | 2025 - 2029 (Ongoing)

B.Tech Computer Science Engineering

- Finalist: Code2Create 48-Hour Hackathon (ACM VIT); developed a local-first AI assistant with visual context-awareness via automated screen capture.
- Relevant Coursework: Object-Oriented Programming (C++), Python Development, Digital Logic & Design, Computer Hardware, Discrete Mathematics.

CLUB INVOLVEMENT

Google Developer Groups (GDG) | 2026- Present

Inner Junior Core Member - Tech (Python)

Incoming Junior Core member for the Python technical domain.

IEEE Computer Society | 2026 - Present

Junior Core - Management (Events)

Assisted in the preparation and execution of chapter events during the Riviera cultural festival.

VinnovateIT | 2026 - Present

Junior Core - Tech (AI/ML)

messIT Web Migration: Contributing to the development team tasked with transitioning the campus mess management application into a web-based platform.

SKILLS

- Languages:** Python, C, C++, Flask.
- Technical Interests:** Local AI/LLM Integration, Socket Programming (IRC), Nmap, ESP32/IoT.
- Systems:** Linux Administration (Ubuntu/Kali/WSL), Headless Server Deployment , Hardware Optimization.

PROJECTS

Automated UPI Payment Tracker

Python, Flask, Pipedream API

Built an automation tool that parses UPI transaction notifications via the Pipedream API to sync financial data to a custom dashboard

IoT Smart Agriculture System

ESP32, Python

Designing an environmental monitoring prototype using an ESP32 and sensors, integrated with a Python server for data collection and prediction using ML models.
